HIBERNATION 2.0

High quality protective plastic, clips and bungees are permanently attached to the top cable

Profile bands with hooks are used to hook up the covers before hibernation

The protective plastic is wrapped around the cover and held in place by bungees and clips

How much time would you need for your orchard?

Action	Persons	Driving speed, km/h	Row distance, m			
			3	4	4,5	5
Opening before the season	3	0,84	4	3	2,7	2,4
Zipping the valleys	2	5,00	0,7	0,5	0,4	0,4
Hibernating after the season	3	0,40	8,3	6,3	5,5	5
Total hours per hectare			13	9,8	8,6	7,8
Total man-hours per hectare			38	29	25	23

Example done with self driving platform, VOEN Hibernation 2.0 + VOEN Zip, excl. perimeter insect net
